| 4465G* | 10' X 100' |
| 4480G* | 16' X 100' |
| 4485G* | 20' X 100' |

*smart tech bags™

Engineered and Manufactured
in the U.S.A. with **100%**
Renewable Energy

Great Prices, Superior Performance

G30 is the latest addition to **Smart Tech Bags™** technology. It is a proprietary additive that provides enhanced performance vs. traditional film.

- ▶ 80% better impact strength
- ▶ 35% better tear strength

Best of all, C&A with G30 is priced lower than standard C&A films.

Better for the Environment

Because G30 is not derived from petrochemicals, lowers the need for traditional polyethylene resin, and is manufactured with 100% renewable energy from sources like wind and solar power, it also helps to lower greenhouse gas emissions. Available in its natural color, this new line of C&A film is a better choice for the environment.

What do we mean by **Natural color**?

C&A film with G30 is naturally transparent white.

In Stock and Ready to Ship

This new line of C&A with G30 is stocked in Atlanta, Boston, Cedar Rapids, Dallas, and Reno for shipment in 24 hours.
