

DUMPSTER LINERS

THE BASICS

Dumpster Liners are typically used for roll off containers, end dump trailers, lugger boxes, and rail gondolas. With an easy installation process, they are formed to fit all standard sizes and provide a barrier between the dumpster and its contents. Our liners are leak, puncture, and odor resistant. This makes them excellent for waste transportation, whether liquid or heavy duty material, and extends the life of the dumpster itself.

Our Dumpster Liners are double sealed and side gusseted. What is the benefit? This construction allows the seal to stay entirely outside of the container once installed, thereby making the liner more form fitted to the container and further protecting against leakage.

DUMPSTER LINERS ON ROLLS

Made on demand, all dumpster liners are packaged one liner per roll on a 1.5" core, boxed individually, and sold by the pallet. More information including lead time and pricing are available by request.

- ▶ Uniquely packaged and constructed for easy installation and maximum protection.
- ▶ Ready for end use – individually boxed on a 1.5" core. No costly and inefficient re-winding necessary.
- ▶ Film is Black Opaque.

ITEM	MIL	ROLL WEIGHT	PALLET WEIGHT	ROLLS/PALLET	ORDER MINIMUM
20 YARD DUMPSTER – 8'W x 4.5'H x 22'L
