

# smart tech bags™

The perfect blend of **technology** and **source reduction**

Over one million Smart Tech Bags are manufactured across America every day. Our production is designed to fill over one hundred thousand same-day stock orders and custom orders in industry-leading times.

### The Best Technology

Smart Tech Bags are made in medium and large layflat and gusseted sizes, made from proprietary formulations developed over thirty-two years of manufacturing. They are engineered to provide three times the impact and twice the tensile strength of

traditional low density polyethylene bags. They are formulated to provide better performance at lower gauges so you'll feel confident using lighter weight bags.

### Maximum Performance with Minimal Environmental Impact

Smart Tech Bags are made with 100% renewable energy generated from sources like wind and solar power. Our eco-conscious line is fully recyclable, completely non-toxic and yields no pre-consumer waste. It's easy to source reduce with Smart Tech Bags.

### American-Made and ISO Registered

Smart Tech Bags were designed and are exclusively manufactured in the United States under rigorous ISO 9001:2008 production processes that guarantee performance control and uniformity.

We're proud to offer you a technologically superior product that provides outstanding source reduction benefits, and now it's even easier on the planet.

# Smart Power

**Smart Tech Bags™** are manufactured in the U.S.A. using **100% renewable energy** generated from sources like wind and solar power.

For every 13,000 MWh of traditional electricity eliminated from the manufacturing process, 18 million pounds of CO<sub>2</sub> emissions are avoided.

That's the equivalent of taking 1,740 cars off the road for 1 year.\*

## Smart Tech Bags

- ▶ Made in the U.S.A.
- ▶ Manufactured using 100% renewable energy
- ▶ Proprietary formulas for performance and strength
- ▶ 100% Recyclable, 0% pre-consumer waste

**Now that's smart power.**
